Clusters

The image shows two screenshots from the Databricks user interface. The top screenshot is the 'Project Name' setup screen, where the name 'Sistema De Gestión para restaurante' has been entered. Below this is a section titled 'What is your preferred language?' with a grid of language options: JavaScript (highlighted with a green box), C++, C#/.NET, Go, Java, C, Perl, PHP, Python, Ruby, Scala, and Other. 'Skip' and 'Continue' buttons are at the bottom right.

The bottom screenshot shows the 'Clusters' page in the Databricks console. The left sidebar contains navigation links: Data Lake, SECURITY, Database Access, Network Access, and Advanced. The main area shows a search bar and a 'Create a New Cluster' button. A cluster named 'Cluster0' (Version 4.4.0) is listed under the 'SANDBOX' environment. Below the cluster name are tabs for 'CONNECT', 'METRICS', 'COLLECTIONS', and a menu icon. To the right of the cluster details, a large grey box contains the text: 'Your cluster is being created. New clusters take between 1-5 minutes to provision.' At the bottom left, there is a 'Get Started' button and a 'Feature Requests' link. The bottom right corner shows a 'System Status: All Good' indicator.
